

- ~ New Science Centre for Bradfield College, featuring 10 labs, 3 prep rooms, 3 classrooms and staff facilities
- ~ Designed to be an education resource itself, the building makes use of photovoltaics upon a green roof, natural ventilation, biomass boiler, grey water recycling and maximises natural daylighting. All data from these resources is linked to display screens inside the main corridors
- ~ New habitats included pond with glass viewing area, fish tank and bat loft with facilities to allow video streaming to display screens
- ~ Awarded BREEM 'Excellent' at both Design and Completion stage
- ~ Completed in September 2010, contract sum £3,260,000
